

Partnership with Aberdeen Science Centre

2026/27

Aberdeen Science Centre (ASC) is proud to collaborate with a diverse range of influential and inspiring organisations, helping us grow and achieve our mission, to inspire a lifelong interest in science, technology, engineering and maths (STEM).

Partnering with Aberdeen Science Centre shows your **commitment to the next generation**, your **passion for STEM learning**, and your **ambition to secure a workforce** fit for the future. ASC plays a crucial role in laying a positive foundation for our children and young people by providing the building blocks for interests and skills in STEM.

By partnering with Aberdeen Science Centre, you can be the engine that enables ASC to inspire the next generation of scientists, engineers, doctors and nurses, innovators, researchers and so much more. Your support will fund all that we do, from the development of new educational programmes, exhibit maintenance, new exhibits and learning resources, as well as STEM engagement with children, young people and adults in the North East of Scotland, and beyond.

Increase

and careers in
STEM

About Aberdeen Science Centre

With over 35 years of experience, Aberdeen Science Centre has mastered the art of making STEM learning accessible, exciting, and enjoyable for all. Our journey has connected us with diverse audiences including children, young people, and adults from a multitude of backgrounds.

Inside our Science Centre over 60 interactive exhibits unveil the mysteries of Space, Energy, Life Sciences, Engineering, and more. Alongside this, our passionate team has crafted workshops and activities that go hand in hand with the Curriculum for Excellence. Through interactive discovery, we reveal the real-world significance of STEM, equipping visitors with vital skills and understanding, and inspiring future careers in STEM industries.

Every year we engage with **over 60,000** visitors including **over 12,000 learners** through our schools and community engagement programmes. We have vast experience of delivering high-quality content to a variety of audiences and specialise in turning tricky science into easy-to-understand activities.

Today's curious children are tomorrow's leaders in science and innovation. You can provide the spark that ignites their interest in STEM.

We are inviting industry partners, innovative businesses and organisations to be part of our story. We rely on the support of forward-thinking businesses to extend our reach, transform lives through learning, and ensure no one is left behind in the future of STEM. Your support not only creates engaging, high-impact science experiences – It's a powerful way to give back, build brand awareness, and secure your own lasting legacy in the region and inspire the STEM talent of the future.
